Database Name: ChromaZona Server Name: (local) Backup Path: C:\ProgramData\Synbiosis\ChromaZona\D		Data Paths
Server Name: (local) Backup Path: C:\ProgramData\Synbiosis\ChromaZona\D	atabase Name:	ChromaZona
Backup Path: C:\ProgramData\Synbiosis\ChromaZona\D	erver Name:	local)
	ackup Path:	:\ProgramData\Synbiosis\ChromaZona\Dat
	Protocol I	
Restore	Васкир	

After some time the Database Updater application will appear. It will attempt to either create and update a new database or update an old database. If successful the database application will close itself. If the Database Updater remains on display then this means the database has not been created. If this is the case please go to step 15, otherwise proceed to step 18

13

Database Name:	ChromaZona 🎦
Server Name:	(local)
Backup Path:	C:\ProgramData\Synbiosis\ChromaZona\Data
	<u>O</u> K <u>C</u> ancel

On the Database Updater Window press the blue button with three dots. The data paths window will appear. Enter the Database name and Server name in the appropriate boxes. The server name will be dependant on the type of installation you have performed but by default it would be (local) for a SQL Server Express installation and (localdb)\v11.0 for a SQL LocalDB Express installation

	Data Paths	
	Database Name:	ChromaZona
	Server Name:	(local)
	Backup Path:	C:\ProgramData\Synbiosis\ChromaZona\Data
Dat	tabase created sucessfully	<u>QK</u> <u>Cancel</u>
	ОК	

Once the details have been entered press the New Database button (on the right hand side of the Database Name). You will see a message saying "Database Successfully", Created press OK, then press OK again on the Data Paths window. If you see a saying "There was message а problem creating the database" try pressing the Create Database button a number of times as occasionally the initial connection fails

Press the Update button. If any database updates are required they will be applied and the dialog will close

Please Note:

After the installation of the camera and serial drivers the installer will check to see if the user is running Windows 10

If you are installing ChromaZona on a Windows 10 computer the installation wizard will not appear. Instead you will be asked to confirm you are using a USB dongle to license the software

If Windows 10 is being run then a prompt will appear with the dialog below

If OK is selected, the dongle drivers will be updated to the correct version and the install wizard will not run. The user will receive the following message:

"Completed USB dongle software installation. Please connect your USB dongle licence following completion of the ChromaZona software installation``

If cancel is selected the normal install wizard will appear later so the media key method of installing a license can be used

The install license will still be available after installation via :

Windows Start->Synbiosis->Support->Install Wizard

	Install Wizard: Protection method	
(16)	Choose the software licensing method you will use with this application:	
	Software Key: You must have a Media Key - groups of numbers, letters and asterisks (e.g. 1234*5678*user*etc) You will need to send a generated Request Key to the Installations Desk to receive an unlocking code.	The licensing wizard will appear. Select the appropriate method for licensing and press Next. If using a
	C Hardware Key: You will need a USB or Parallel port Hardware Key connected to this computer. This Wizard will install the appropriate device drivers if they are required.	hardware key (a USB dongle) do not connect the key until instructed to
	Network Key: You will need network access to a NetHASP License key server. This Wizard will check that a server is available.	by the wizard . The pages that follow will vary depending on the selection. Follow the on-screen instructions
	< Back Next > Cancel]
