➡ Select Next

➡ Select a place for program shortcuts

➡ Select Next

④ Installation

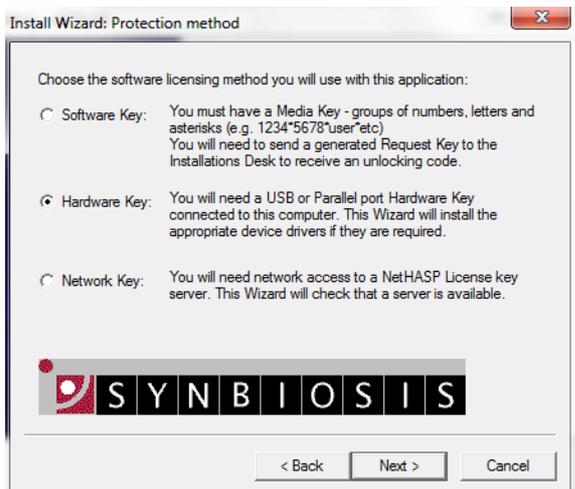

➡ Select Install

➡ Select Finish

(5) Security Code

Install Wizard

This wizard installs software protection from the Synoptics Security suite.

To proceed you will need a Media Key - groups of numbers and letters separated by asterisks (e.g. 1234*5678*etcetra) - or access to a hardware key.

CANCEL THIS INSTALLATION NOW IF YOU DO NOT HAVE A MEDIA KEY OR AN APPROPRIATE HARDWARE SECURITY KEY

Please enter the name of the software title you wish to install (if not already set)

Software Title:

ProtoCOL 2
ProtoCOL 3
ProtoCOLOR UDS Analyzer
aCOLyte

➡ Select aCOLyte

➡ Click Next

Install Wizard: Protection method

Choose the software licensing method you will use with this application:

○ Software Key: You must have a Media Key - groups of numbers, letters and asterisks (e.g. 1234*5678*user*etc)
You will need to send a generated Request Key to the Installations Desk to receive an unlocking code.

● Hardware Key: You will need a USB or Parallel port Hardware Key connected to this computer. This Wizard will install the appropriate device drivers if they are required.

○ Network Key: You will need network access to a NetHASP License key server. This Wizard will check that a server is available.

➡ If a hardware key is being used, select the type of hardware that will be used

➡ Click Next

InstallWizard

⚠️ Installing new device drivers
This will take a few seconds - please wait for the process to complete

OK

➡️ Prepare the PC to install the device driver for the security key. Make sure there are no security keys attached. Click Next to install drivers - this may take a few seconds

➡️ Click OK

Install Wizard: Connect Hardware Security Key

⚠️ Please connect your key to the desired port on your computer.

If you are using a USB key, you may see a dialog telling you that new hardware has been found. The system may then spend a little time rebuilding the driver information database. No action is required from you during this process!

When complete, the LED on the USB Key should illuminate.
(Note that there is no LED on a Parallel Port key)
After the Key has been connected, press Next to perform a quick check that it is functioning properly and is available for applications to use.

SYNBIOSIS

< Back   Next >   Cancel

➡️ Connect the hardware key and follow the instructions from the dialogue box

➡️ Click Next

Install Wizard: Check Security Key

Attempting to use application program interfaces to read Security Key.
Result of query is:

22568*syn4437*e3ba9da_clean_w7*p

The test was successful!
Installation of your Security Key is complete

Press Finish to exit
or Press Back to test your key on other USB ports
(recommended for Windows 2000 and Windows XP when unprivileged users may move the Key between ports)

SYNBIOSIS

< Back   Finish   Cancel

➡️ When you are told that the test was successful click Finish to exit or Back to install the security key on other USB PORT

➡️ Plug in the USB lead and double click the aCOLyte; the software should now open.
